AGON PACIFIC GROUP

The reliability of power plants is undermined if unscheduled and forced outages occur. Agon Pacific was created to meet the demand for an inspection concept, independent of owner and manufacturer, and to provide accurate surveys of equipment conditions

Our highly qualified staff has experience in Boilers, Pressure Vessels, Piping and various Non-destructive Examination services (NDE). Our team consists of Mechanical and Electrical engineers, NDE technicians, boiler specialists and design engineers. We help our customers prevent losses with a variety of inspection services and by providing reports with recommendations produced by senior advisors. This includes annual outage inspections of the boilers, critical piping and other critical items
